

P-Sh-N

Simco-Ion anti-static bars are also available for applications requiring long range neutralisation. These anti-static bars are shockless; each emitter pin is coupled capacitively to the high voltage.

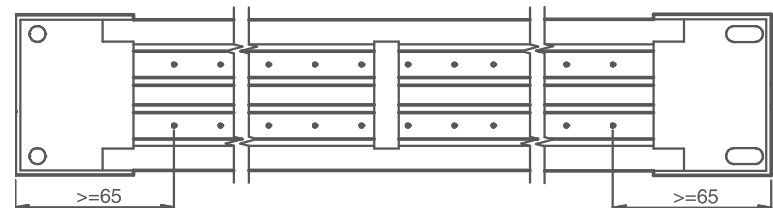

This type of anti-static bar, a more powerful version of the EP-Sh-N is highly effective and, with its long range, ideal for neutralisation of static electricity on materials when the distance varies. Under certain conditions the maximum distance may even be as large as 600 mm.

Technical specifications

Working distance	600 mm max.
Housing material	anodised aluminum
Inner bar material	PVC
Emitter pins	special alloy
Cable	metal shielded
Weight	1 kg/m
Ambient temperature	0- 55 °C
Use circumstances	Industrial
Options	right angle cable exit airtight connection
Operating voltage	7 kV AC
Suitable power unit	A2A7S/ MPM
Approval	UL
Maximum length	11140 mm
